

When networks run the world, **NETWORK MANAGEMENT IS EVERYTHING.**

Gain true network visibility and control with Auvik.

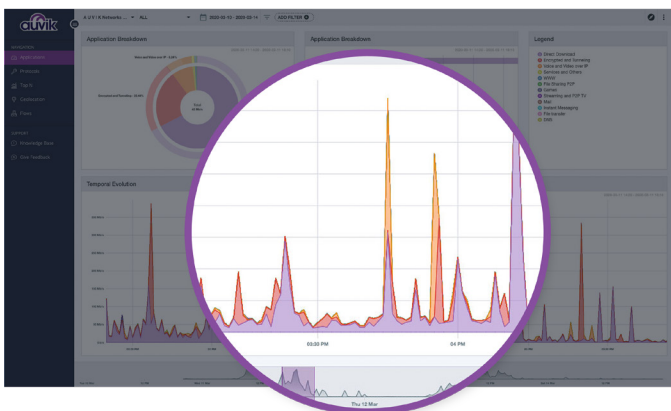

Real-time network mapping & inventory

Quickly discover & audit new networks. Then, stay in the loop—you'll always know exactly what's where, even as users & devices move.

Automated config backup & restore on network devices

Mitigate network risk with no manual effort.

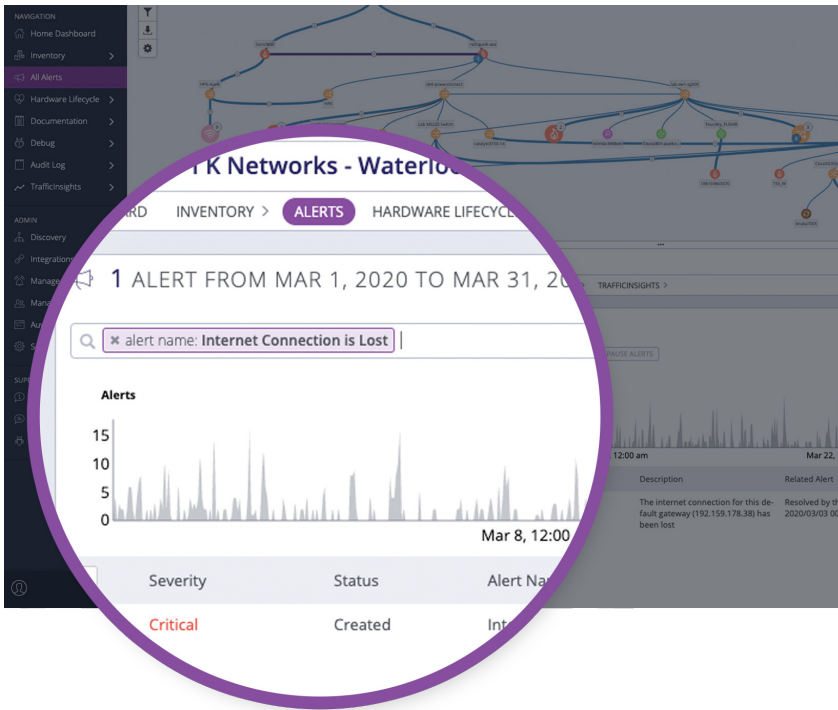

Deep insights into network traffic & flows

Quickly solve network bottlenecks & spot potential security vulnerabilities.

“Auvik can be an absolute lifesaver. Having immediate visibility into what’s plugged in where has ended the days of wild goose hunting.”

Benjamin Rutter, The Logic Group

Automated network monitoring

See and solve issues—before they become big problems.

Secure remote access to network devices

Manage the network from anywhere you are.

Full visibility & powerful troubleshooting features

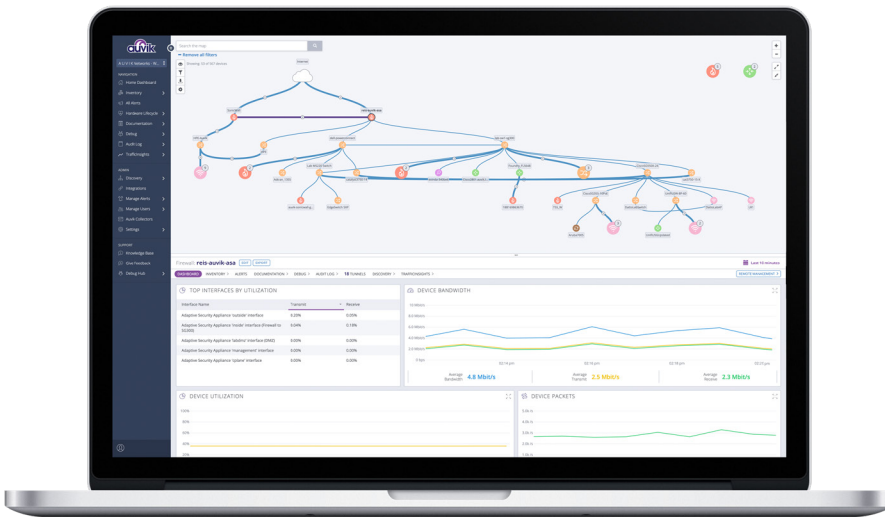

Empower team members at all levels to resolve problems hours faster.

Integrations with systems you use every day

Improve the efficiency of your team's workflow with integrations into ticketing systems, remote management systems, documentation and reporting tools, chat apps, and more.

"The ease of documentation, troubleshooting and device management has made our lives much easier. Not only are we able to monitor our networks with ease we can also visually see them."

Will Lee, PNC IT

Fast & easy to install

Deploy a collector in minutes. No new hardware, no onerous configuration.

Vendor-neutral

Support for 15,000 devices from 700+ vendors—and growing.

Free support

Need help? We're always here. Call or email us as often as you need to.

"Having our Tier 1 techs understand how things are connected is valuable—and having more eyes on the network helps us be proactive."

Darrin Noel, Mann Packing Company
